COMPANY (ITALY)

Clerici Tessuto, founded in 1922, is one of the most important textiles manufacturers in the world for the luxury sector, with ranges for men's and women's clothing, beachwear, accessories and home furnishing. The company – more than 300 employees – manufactures, finishes, transforms and sells more than 4mil. mt. of fabric per year, for 2.500 customers in 70 countries.

PRODUCTS

Yarn-dyed, piece-dyed, jacquard and printed fabrics; ready-made accessories. Customized fabrics, designs and colorways.

PRODUCTION

Sampling MOQ 1mt,
lead time 1 week;
Production MOQ 35mt,
lead time 4 weeks.

COLLECTION

The synergy between swimwear and resort wear is the leitmotif of the new Beach & Body Summer 2026 collection: a proposal increasingly characterized by the use of cutting-edge fabrics, both in terms of functionality and environmental sustainability. Among the swimwear proposals, recycled polyester microfibers and brilliant lurex microfibers stand out, alongside the traditional microfibers with both glossy and matte appearances, all rigorously OEKO-TEX certified. The wide selection for resort wear includes silk-inspired fabrics, such as silk/cotton and viscose jacquards, FSC-certified viscose crepe de chine, and fluid silk blend jerseys, alternating with more textured and cotton-like articles, such as silk/cotton creponne and GOTS-certified organic cotton voiles and jacquard gauzes, and European Flax-certified linen fabrics. The preview of the collection has two themes: the first theme is inspired by interior design, while the second one evokes floral interpretations with geometric details that make them fresher and newer.

Iluna Group founded in 1970 it's an Italian company specialized in the totally vertically integrated production of elastic lace. Iluna presents an exceptional range of natural colors made from flowers and plants and a color chart with 16 shades, which is continuously expanding. All dyes are GOTS certified and meet the requirements of Oeko-Tex® Standard 100.

PRODUCTS

Tulle, rigid and elastic lace for outerwear, underwear, corsetry and beachwear, hosiery and seamless garments with Karl Mayer technology. Infinite possibilities of product customization through CAD simulations and subsequent prototypes with rapid processing in the dyeing laboratory. Labdip and color cuts on request with fast deliveries.

PRODUCTION

Stock quantities: no MOQ, delivery 1 week. Standard: MOQ 500 m, delivery 4 to 8 weeks. Lower quantities with a price surcharge.

COLLECTION

The key word of the new collection is "experimentation": the search for new solutions that can offer consumers style, sustainability and well-being translates into innovative blends, natural dyes and smart prints. Amazing GRS prints over sustainable Lurex meshes to add new smart printed solutions to its Green Label line. Among the smart ingredients are Renycle® and Q-Nova, both GRS-certified pre-consumer recycled polyamide yarns, in addition to premium recycled stretch ROICA™ EF by Asahi Kasei. The result is a comfortable and ultralight product that remains true to a high value of creativity and responsibility. In terms of aesthetic innovation, explorations continue with a yarn blend of FSC-certified viscose and polyamide, resulting in striking new Textronic designs. The 3D effect embossed designs create a cloud effect that, combined with Lurex, shows unexpected glows.
